

Building the Education Revolution

We at Brikmakers are thrilled to present you with the following range of two-course clay bricks, approved for use in the BER initiative.

All Brikmakers bricks are tested to comply with the stringent requirements specified under the Australian Standard AS/NZS 4455.

Not only are the following colours and finishes available, Brikmakers also produce a number of other face and internal bricks, as well as accessories including snaps, sills and squints. Many of these have been designed to help you match existing brickwork.

Brikmakers' new state-of-the-art facility in South Guildford is capable of producing all bricks from one run and can output up to 110 million bricks per year.

If you would like a sample, please feel free to contact us and speak to one of our friendly sales representatives.

Thank you for your consideration!
