

Build a home with the beauty and colour of WA's landscape.

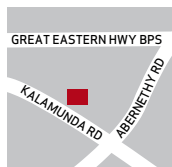

No other land is as rich in colour as Western Australia. Where else in the world can you drive for two hours and see a vista of sun-scorched red earth turn into cool cream sand then vibrant green forest?

At Brikmakers, Western Australia isn't just our home, it's our inspiration. So we've used a diverse selection of WA clays to create a vast range of face bricks that capture the many different shades, hues and textures of the state. The reds. The creams. The umbers. And more.

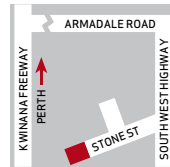

Whether you're building something contemporary or traditional, you're sure to find the perfect brick to suit your design amongst our range of classic face bricks and two-course face bricks. We also have a full range of accessories to complement them as well as general purpose bricks for render applications.

So now that you're ready to start building, why not build a home with the beauty and colour of our landscape by choosing Brikmakers for your bricks. For further information about the range shown here, please contact our friendly sales team today.

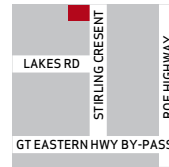

They're the West Australian brick.
