

The '5p' check list.

We recommend the 'P5' check list is used when using a product for the first time or in different circumstances. Consider the following check list before commencing a project.

Planning

What is the project you about to undertake? Consider the performance requirements: is it a high traffic area? Does it need to be flexible? Will it require extended UV durability? Does it need to be slip resistive?

Preparation

Preparation is the key to a successful project. To produce a professional finish, ensure all surfaces are clean and dry before applying a Crommelin® product. Ensure all surfaces are free of dust, grit or any other contaminants.

Product

Now you've planned and prepared, choose your product in accordance to: substrate, environment and usage. Ensure you use the correct product for the needs of the project and carefully calculate the amount required using each products' own coverage rate.

Prior Trial

A prior trial & preliminary application of product should be carried out to a test area to ensure the desired objective is achieved. This is essential, as colour, sheen and finish can vary depending upon the condition of the substrate.

EASY SELECTION GUIDE

Why seal?

Paving will add increased value and appeal to your home and new outdoor living area. However with everyday use this new paving can be subject to all manner of possible staining and discoloration. Sealing paving whilst new will help ensure your aesthetic is maintained and your investment protected.

The Crommelin® Enhance™ range of paving sealers will seal your paving to help resist stains and are available in a variety of finishes.

Which product?

Today, after over 50 years of market research, product testing and refinement, Crommelin now offer Brikmakers and you, the option of 3 different sealers suited to nearly every installation.

The Crommelin Enhance range has been manufactured with ease of application, in mind. Using standard application tools, anyone can create a lasting stain resistant barrier that will preserve, restore, beautify and protect your paving.

Selection Chart

- Acceptable
- Good
- Excellent

	Crommelin Enhance Penetrating	Crommelin Enhance Satin	Crommelin Enhance Gloss
Driveways			
Concrete (Inc. stencilled)	●○○	●●●	●●●
Reconstituted Pavers	●○○	●●●	●●●
Patio Entertainment Areas			
Concrete (Inc. stencilled)	●○○	●●●	●●●
Reconstituted Pavers	●○○	●●●	●●●
Pool Surrounds			
Concrete (Inc. stencilled)	●●●	●●○	●○○
Reconstituted Pavers	●●●	●●○	●○○

For pool surrounds and sloping surfaces test for slip resistance prior to full application.

Which finish?

The Crommelin Enhance range offers 3 distinctly different finishes, which provide varying levels of colour enhancement and sheen. As all paving can vary, Crommelin recommend a sample area be sealed prior to full application to ensure the desired result is achieved.

Please refer to the selection chart and guide below to determine the best sealer for your application.
